FILTRATION & WATER TREATMENT

WATERCOM VITALIA INLINE

- ▶ **ULTRA SPACE-SAVING**
- ▶ **INLINE SALT ELECTROLYSIS INCLUDED**
- ▶ **SALT REPLACES CHLORINE**
- ▶ **REDUCED OPERATING COSTS**
- ▶ **COST-EFFECTIVE AND QUICK TO ASSEMBLE**
- ▶ **AVAILABLE ONLY FROM CF GROUP PARTNERS**

Everything is included!

- CF Control 100 measuring, control and dosing system Model redox/pH
- Remote monitoring CF Control 100 (Wi-Fi) via dinoAccess
- Flow valve with sample water monitoring
- Heating control incl. temperature control (optionally via heating or solar circuit); optional temperature sensor
- Inline Access electrolysis system 16 g/Cl₂/h for pools up to approx. 80 m³. Including an automatic cover
- 1 peristaltic dosing pumps dinodos GO for pH, up to 6 l/h flow rate at 1.5 bar back pressure, incl. suction set and accessories
- VITALIA VS speed controller for filter circulation pump
- Filter tank VITALIA 652S, diameter 660 mm. Laminated polyester tank with plastic glass lid (10 year guarantee), 6-way valve (2"), oil-filled pressure gauge, screw connection (2").
- Filling: VitroSphere filter beads or filter sand (optionally)
- Filter pump VITALIA Comfort 15W (15.2 m³/h at 10 mWC)
- Watercom compact design on filter pallet; dimensions: 1000 (l) x 830 (w) x 1250 mm (h)
- Pre-assembled at the factory, pre-wired, tested

Watercom stands for compact, space-saving "All in One" swimming pool technology. Everything included: automatic measurement, control and dosing with remote monitoring via smartphone or similar

The inline model includes the production of disinfectant via salt electrolysis. Also included is the complete filter technology with robust filter pump, energy-saving and noise-reducing filter pump control, heating control, safety functions, etc.

Watercom VITALIA – the best water quality is no longer a question of the price.

Keep an eye on your CF Control 100 control around the clock with dinoAccess.

+ CONVENIENT

Space-saving, clearly arranged and quick to install on site. The smart Watercom design makes it possible.

+ COMPLETE

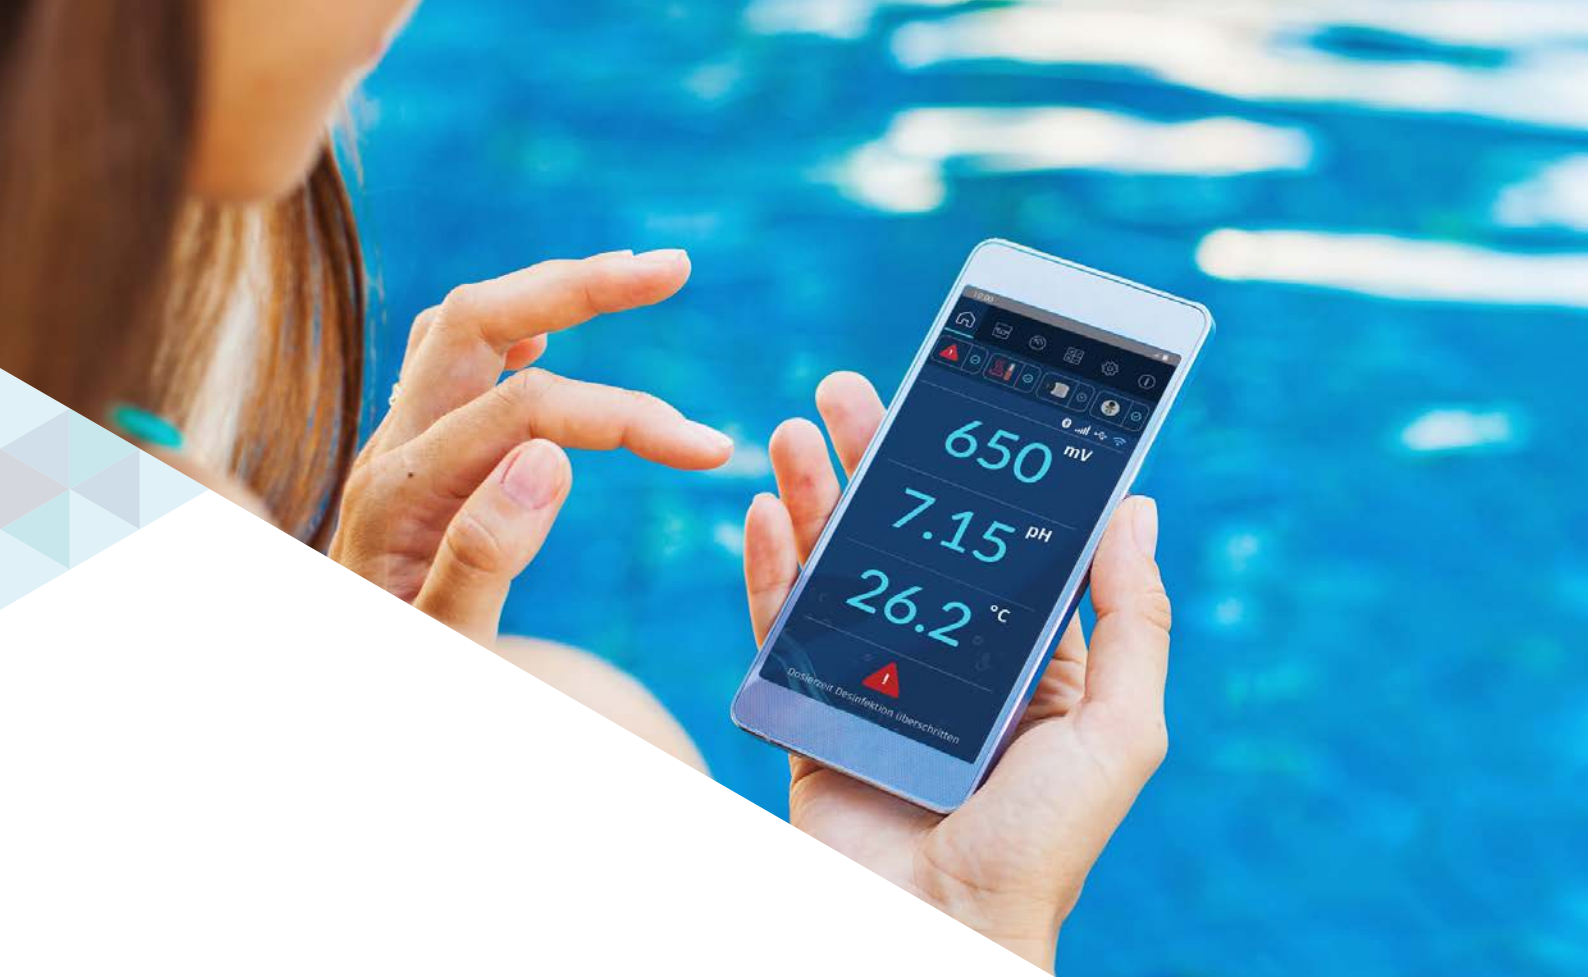

The Watercom VITALIA is almost completely pre-assembled. The filter pump is pre-piped, which also applies to the electrolysis cell with paddle switch. Water sampling and return are installed, as is the injection point for pH minus.

+ ECONOMICAL

VITALIA VS filter pump speed controller. Saves electric energy*, reduces pump noise* and improves the filtration quality. Daily filter times and operating modes are set via the touch screen.

* depending on operating conditions, compared to standard operation of a pump without controller

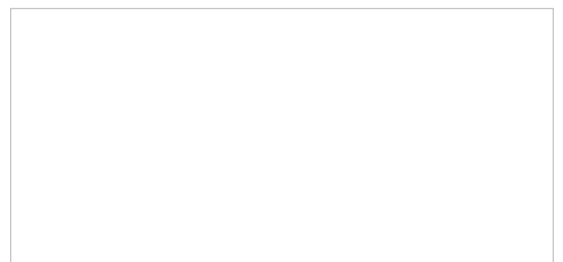

DINOACCESS APP

Display of all important parameters and settings of the CF Control 100 system in the dinoAccess app. Intuitive menu navigation to ensure an easy and convenient operation of the CF Control.
