SwimLoop

The innovative alternative to counter-current system

PRODUCT INFORMATION

SwimLoop, the revolutionary AI-based swim tracking system. With SwimLoop, you can organize professional swim training even in very small pools and track training progress.

DESCRIPTION		ART. NO.		
SWIMLO	OP .	2290-000-00	В	
Compl	ete system, incl. tripod for smartphone			
SWIMLO	DP BELT	1 2290-000-50	В	
For sta	ntionary swimming in the pool (without SwimLoop app and SwimLoop b	box)		
• Com	t consists of: nfortable swimming belt with convenient quick-release fastener swimming straps for different elasticities and lengths ust attachment loop without Velcro for secure fastening			

· Sports bag for easy storage and quick drying of the SwimLoop belt

1 SWIMLOOP

If you want to train swimming in your pool, you need either a longer pool or a counter-current system. Limited space or reluctance due to additional costs often pose obstacles.

The SwimLoop solves this issue. Not only is it a cost-effective alternative, but it is also a genuine training tool with added value!

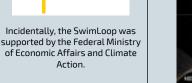

The SwimLoop is a swim tracking system developed in collaboration with Olympic athletes. The centerpiece is the SwimLoop AI app. It uses Bluetooth to connect to an innovative sensor integrated into the accompanying swim belt. The SwimLoop provides detailed statistics about swimming (distance, calories burned, number of strokes, swimming style, etc.). The data is transmitted and visualized in real-time.

Each swimming session adds new data to the user's profile. Training progress can be monitored through statistics, showing how swimming performance has improved over time. The app aids in interpreting the data and provides detailed insights. Additionally, users can set individual goals or even compete against their own previous sessions.

The SwimLoop is suitable not only for large swimming pools but also for smaller above-ground pools. Installing the SwimLoop is remarkably simple, making it possible to upgrade almost any pool into a proper "highend sports device" for a small investment.

Incidentally, the SwimLoop was supported by the Federal Ministry of Economic Affairs and Climate Action.

With just a few simple steps and accessories, the SwimLoop turns even the smallest pool into a fitness device.

With SwimLoop, you can organize professional training and track training progress.

ATTRACTIONS

dinotec JET

Submerged counter-current system

PRODUCT INFORMATION

For wall mounting in any type of swimming pool, as attraction, for fitness training, as wave pool or air bubble bath, underwater massage (consult physician) and swimming without turning (also possible in small pools).
