ROLLER COVERS - A MUST

Over 80 % of heat in swimming pools is lost through the surface of the pool. These losses can be minimized by using a project-specific roller cover. In combination with polycarbonate solar slats a heating effect is created in addition.

We offer an interesting selection of rollers for above-ground or in-ground installation, which allow an aesthetic integration of roller covers into your swimming pool project.

Our slats are manufactured according to the strict French standard NFP 90-308 and guarantee a high quality standard. The patented system with removable end caps of different sizes allows an easy assembly and disassembly of individual slats on site.

COVERS

AUTOMATIC AND INSULATING COVERS

DIN EN 17645 - Energy efficiency

In 2024, the CF Group introduced standardized information on the energy efficiency of their cover products.

HOW IS THIS CALCULATED?

The 3 indicators (S, I and E) are calculated on the basis of specific physical quantities:

- **Index S:** g_{tot} Transmission coefficient of the slats for solar radiation: How much of the solar energy in % reaches the water to heat it (based on the average European solar radiation in a 5 month season).
- **Index I:** Insulation coefficient, based on the heat transfer coefficient U including surface phenomena: How many watts are lost per square meter of pool surface area (given a temperature difference of 10°C between water and air).
- **Index E:** Real Coverage Index (RCI) of the pool: percentage of the pool's surface area that is actually covered and thus stops evaporation (compared to a daily drop in the water level by 6 mm or 192 liters/day for an uncovered 8 x 4 m rectangular pool).

The NTB value is calculated from the natural heat balance by adding the three indices. This results in the energy efficiency class.

A cover that allows the water temperature to rise without additional heating has a positive NTB value.

A cover with a negative NTB value requires a supplementary heater to increase the temperature (and stabilize it at the start of the season). The energy requirement of the pool is calculated by multiplying the NTB value by the surface area of the pool. This is the heating power (W) required to maintain the temperature in the pool. When considering the energy equivalents (Wh), the operating times should also be taken into account.

The standard labeling also includes the electrical power (in active and standby mode) of the pool roller cover.

This power is not taken into account for the energy efficiency class of the product. Depending on the requirements, the installation position and the design of the pool, special significance can be attributed to each indicator on a case-by-case basis.

- The insulation and evaporation indices are of essential importance for pools that need to be heated, especially in cold regions.
- The solar index is crucial for swimming pools. The design of the pool heating can be smaller. This index should only be taken into account for pools that are covered during the day.
- The significance of the insulation index should be put into perspective for pools that are exclusively used in the summer.

DEL premium cover Aleovar black
Energy efficiency class

EXAMPLES

EXAMPLE 1:

Grey opaque PVC slats 69: NTB = - 33 W/m², for a 30 m² pool the NTB is - 1000 W, i.e. 24 kWh/day of lost energy. To stabilize the water temperature under these conditions, a heat pump with a power output of 8 kW would have to run for about 3 h/day.

EXAMPLE 2:

Crystal black solar polycarbonate slats: NTB = + 84 W/m², for a 30 m² pool the NTB is + 2500 W, meaning 60 kWh/day of natural and "freely" obtained energy. This energy is equivalent to what an 8 kW heat pump can deliver in approximately 7.5 hours per day.

COMPARISON EXAMPLE 1 AND EXAMPLE 2:

Under these conditions, choosing crystal black solar polycarbonate slats instead of grey PVC slats saves about 10 hours of daily heat pump operation, which translates to savings of approximately €4 per day. Given a COP value of 5 for the heat pump, depending on the electricity price.

Pool covers offer environmental benefits that go beyond their thermal performance:

- Protect against dirt from the environment and UV rays (for opaque covers).
Limit filtration and treatment times and therefore the electricity consumption of these devices and the need for water care products.
Note that the presence of a cover improves the performance of the treatment systems according to EN 17645.
- By preventing evaporation, water losses and thus the water demand are minimized.

EN17645:

If a swimming pool is heated, it must be equipped with a cover. If a heated swimming pool does not have a cover, it is not possible to classify the pool according to this standard.

NB: Pools without heating are only feasible in warm (Southern Europe) or temperate climates, when the pool water is able to absorb the ambient heat and sunlight at the hottest times of the day and the insulation is sufficiently effective to store the heat absorbed at other times of the day.

AUTOMATIC SLATTED COVER

ROLLFIT

A smart solution

POOL TYPES

- For pools with a width of 2.5 - 6 m and a length up to 20 m.

PRODUCT INFORMATION

- + Seamless integration of the cover in the pool
- + Aesthetic and discrete concept
- + Suitable for renovation and new constructions

Source: CF-Group

MOTORIZATION

There are 2 motorizations and 2 fixings available:

- Motor in a dry pit - insert mount fixing
- Tubular motor - insert mount fixing

The power is determined depending on the pool dimensions and the depth at which the Rollfit is installed: 120, 250, 500 or 750 Nm (750 Nm: tubular motor).

Tubular motor:

- 3.1 m cable
- Excellent power cable quality and improved strength
- Stronger, lightning-resistant limit switch sensors.
- Simplified limit switch sensor wiring: reversible cores (no polarity).

Control via Wi-Key remote control, key switch or LivePool app.

Wi-Key emitter

SHAFT

Shaft optionally in anodised aluminium or stainless steel (316L)
Width: up to 6 m

NICHE

- The rails are installed to facilitate the passage of the slats when the cover is being rolled or unrolled
- For niche dimensions, refer to the technical information.

ALUMINIUM BEAMS

- Dimensions: 150 x 100 mm
- 1 beam in the upper part and 1 beam in the lower part to keep the decking vertical

SLATS

- PVC slats 84 mm for standard pools
- PVC slats 69 mm for all applications
- Polycarbonate solar slats

MOUNTING

Pushlock (optional)

Surface mount version

DECKING

- PVC decking, 1 x 0.75 m, attached to beams with fixing clips. (PATENTED)
- 3 colours: white, beige or grey.
- Decking to be covered from the inside with reinforced membrane (thickness: 20 mm).

AVAILABLE VERSIONS

- Dry pit motor
- Tubular motor

4 MOTOR POWERS: 120 NM, 250 NM, 500 NM AND 750 NM

- Improved cable quality
- Thunderproof limit switches
- Simplified wiring of limit switches due to reversible cores (no polarity)

ELECTRIC BOX

- Exterior wall mounting to simplify installation
- Tropicalized boards for greater resistance (especially for tubular motors)
- Removable terminal blocks for easy electrical installation for the version with tubular motor, except for the motor and mains connection
- Integrated torque limiter interrupts the cover from being opened in case of excessive force, adjustable via potentiometer
- For higher operational safety, power module and control module are independent of one another in the tubular motor version

Filter stop

Connects the water treatment with the roller cover. Stops the water circulation while the cover is moving to avoid the slats from being drawn in. This feature can also be used to lock underwater lights, for example.

OPTIONS

IVERNEA/ IVERNEA PLUS

Remember to order a winter protection to protect your slats from UV radiation and dirt.

PRICES ROLLFIT

HOW TO CALCULATE THE TOTAL PRICE

ROLLFIT UP TO 6 X 15M

i ROLLFIT UP TO 6 X 15M

- Wall units or sealing kit, tube and motor.
- 1. Determine the pool width and length.
 - 2. Determine the total pool depth.
- You get the required motor power and tube diameter.**

EXAMPLE

- SWIMMING POOL 4.50 X 10.50 M:**
- 1. Calculation: width 5 m and length 11 m.
 - 2. The total pool depth can be < 2.13 m or between 2.13 m and 2.97.
- For a pool depth of 2.50: 750 Nm motor, 140 mm tube.**

i INFORMATION

MOTORIZATION

Dry pit versions and tubular motor versions have the same price. Please state the selected motor type in your order.

i INFORMATION

SLATS

PVC 84 slats are only available for standard in-ground slatted covers, pool width up to 6 m.

If you have an overflow pool or need cut-outs, please use the PVC 69 slats.

AUTOMATIC SLATTED COVERS

ROLLENERGY

Suitable for all pool types, whether new construction or renovation

PRODUCT INFORMATION

- + No structural changes needed
- + Easy to maintain
- + Immersed watertight tubular motor

Source: CF-Group

END-STAND

- White composite, 12 mm thick.
- Widened cable channel with cable protection cover.
- Delivered with drilling template.
- Special small plate available for pre-fabricated pools.
- 2 fixings available:
 - Standard fixing: surface mount.
 - Hanging mount fixing: on brackets (option).

Standard plate

Small plate for polyester shell pools

MOTORIZATION

- Immersed tubular electric motor with electronic limit switches.
- With 230 Volt control box. Equipped with "stop salt" control box which transmits "cover open" or "cover closed" information to the electrolysis system (if available) for an automatic control of the water treatment capacity.
- Operation via Wi-Key remote control or key switch.

Wi-Key emitter

ALUMINIUM BEAMS

- 3 colours: white, beige or grey.

SLATS

- PVC slats 84 mm for standard pools
- PVC slats 69 mm for all applications
- Polycarbonate solar slats
- See page 233.

Surface mount version

MOUNTING

- Pushlock automatic, Pushlock, Quicklock, or Straplock.
- See page 236.

DECKING

- Made of IPE wood or aluminium
- Available in 3 colours: grey, sand or white

SHAFT

Shaft optionally in anodised aluminium 20 µm or stainless steel (316L)

IDEAL FOR RENOVATION

- Easy and fast installation thanks to fixing plate which facilitates the installation of cables.

2 MOTOR POWERS AVAILABLE: 120 NM AND 250 NM (DEPENDING ON POOL SIZE)

- Improved cable quality
- Thunderproof limit switches
- Simplified wiring of limit switches due to reversible cores (no polarity)

OPTIONS

STOP FLOW

The filter pump is interlocked when the motor of the roller cover is running.

HANGING PLATES

With this option, the plates are fixed at 90° using stainless steel plates installed under the pool copings. Hanging plates are also available in small sizes for pre-fabricated pools.

POOL EARTHING

The pool earthing and its earthing ring (paddle clamp) are a unit and allow discharging leakage currents to the ground (compulsory for metal panel pools).

IVERNEA/ IVERNEA PLUS

Remember to order a winter protection to protect your slats from UV radiation and dirt.

SECURIWALL

A sturdy, robust partition designed to provide additional protection when installing Rollenergy roller covers, e.g. as retrofit during renovation

PLEASE CONSIDER

LEVEL CONTROLLER

When purchasing this roller cover, we strongly recommend installing a water level controller. Take advantage of our complete set (float, wall bracket, and solenoid valve) for connection to the filter control system.

See page **132**.

PLEASE CONSIDER

DECKING

The decking is supplied assembled and can be mounted on sides 1 or 2, depending on the selected aesthetics.

ELECTRIC BOX

- Exterior wall mounting to simplify installation
- Tropicalized boards for greater resistance (especially for tubular motors)
- Removable terminal blocks for easy electrical installation for the version with tubular motor, except for the motor and mains connection
- Integrated torque limiter interrupts the cover from being opened in case of excessive force, adjustable via potentiometer
- For higher operational safety, power module and control module are independent of one another in the tubular motor version

Filter stop

Connects the water treatment with the roller cover. Stops the water circulation while the cover is moving to avoid the slats from being drawn in. This feature can also be used to lock underwater lights, for example.

Aluminium beige

Aluminium white

Aluminium grey

Decking (price per element)

Dimensions	1.00 m x 0.90 m	1.00 m x 0.75 m	0.50 m x 0.90 m	Element < or > per 0.90 m	Cutting
Decking made of IPE wood					
Decking made of aluminium					

Examples of calculations:

- Pool width 4.50 m: 4 elements each 1.00 m + 1 element 0.50 m.
- Pool width 4.80 m: 5 elements each 1.00 m + cut-out.

Beams and wall supports

How do you choose the right support beam?

Beam dimensions in mm (B).

Beams

- 100 x 100 mm or 120 x 100 mm
- Lacquered aluminium

For insert mount supports

For hanging mount and surface mount supports

Wall supports for beams

Built-in beam supports

Adjustable beam supports, hanging

Adjustable flat beam supports, hanging

Surface mount beam supports *****

Middle telescopic support for beams

Max. length of decking 90 cm (if longer, please contact us).

Required for beams:

- 100 x 100, width exceeding 5.10 m
- 120 x 100, width exceeding 6.10 m

Middle support up to 8 m

Middle telescopic support up to 8 m pool width

PLEASE CONSIDER

COLOURS

Beams and wall supports for beams are available in white, beige or grey.

PRICES ROLLENERGY

SUPPORT BRACKETS FOR DECKING WITHOUT BEAMS

Hanging plate at same height as support bracket

These brackets for deckings without beams are made to extend the copings above the pool edge and support the decking of the niche. This solution is particularly convenient for high water levels.

1 standard bracket (recess = 90 cm; if larger, please contact us)

PRO TIP

COLOURS

To make on site installations easier, the following items can be ordered in advance:

- Top hanging plate at the same height as the support bracket
- Skimmer reinforcement kit (option 2)
- Liner protection wedge (option 3)

Please indicate this on the order form.

Easy maintenance

The bracket can be removed without having to remove the coping.

Protection of lining

The stainless steel pad is covered with soft PVC which avoids damaging membranes and liners.

To compensate for imperfections of the wall, a 2mm self-adhesive elastomer seal is included with each bracket. The seal should be fitted between the wall and the membrane or liner.

How to calculate the required number of brackets

Number of supports per m depending on the load

Decking weight Kg/m ²	≤ 50	≤ 100	
	1	2	
Standard 900 mm			Number of supports/m
	100	50	Distance between 2 supports (cm)

INFORMATION

If the pool is intended for intensive use (public use), a larger number of support brackets must be provided. In this case, please contact our customer service to adjust the number of support brackets.

INFORMATION

PRICES

All prices in € ex works, plus VAT, freight and packaging.

For flat rates for freight and packaging (standard), please refer to the table on p. 227.

Dealers category D

Option 1: Wheels (small) for high water level

The wheels are installed on site, on standard brackets for high water level pools.

Option 2: Skimmer reinforcement kit

This kit is used to install one or two brackets in front of a wide skimmer (external dimension up to 82cm) without spot-drilling it. This kit allows installation of a bracket even if there is no concrete to fix the bracket on.

Option 3: Liner protection wedge

This option is for pools fitted with hook beads for which no levelling is made.

Option 4: Telescope extension

This option is used for cassettes between 90 and 110 mm.

Prices

Item		€ excl. VAT
Support bracket for decking without beams ≤ 90 cm	Each	
Option 1: Wheels (small) for high water level	Per kit	
Option 2: Reinforcement for skimmer (set)	Per kit	
Option 3: Liner protection wedge	Each	
Option 4: Telescope extension for cassettes up to 110 cm

ROLLER COVERS

SECURIWALL

A sturdy separating wall

POOL TYPES

- For pools up to 7.07 m wide and 2.07 m deep (at least 8 cm from the top edge of the pool if the water level is high)
- For pools deeper than 2.07 m with high water levels or non-standard bottom profiles, please consult us.

PRODUCT INFORMATION

- + Innovative design and materials
- + Surface refined and extremely stable structure
- + An essential complement to the Rollenergy Evolution and the ROLLIN in-ground roller cover
- + Easy installation, supplied fully assembled

Source: Chemform

FIXING PLATE

- Made of white composite fiberglass, located behind the separating wall, and therefore invisible
- Special location for surface mount beam supports
- 2 fixings available:
 - Standard fixing: surface mount
 - Hanging mount fixing: with angle brackets (option)
- Colours identical to Securiwall colour

FRAME

- Frame made of glass fiber reinforced plastic

WALL

- PVC panels, thickness: 40 mm
- Lightweight material
- Resistant to UV and chemicals
- Excellent corrosion resistance
- High mechanical strength
- Available in 3 colours: white, beige or grey

SECURIWALL FOR FLAT FLOORS:

max pool depth (m)		1.07	1.32	1.57	1.82	2.07

PACKAGING COSTS

Packaging costs for SecuriWwall

COLOURS**AVAILABLE WALL COLOURS**

Beige

White

Grey

OPTIONS**HANGING PLATES**

The plates are fixed to the brackets with stainless steel plates installed on the pool edge under the coping.

INFORMATION**FOR ALL CONFIGURATIONS**

Securiwall can be used for all types of pools and floor profiles.

EASY INSTALLATION

The Securiwall separating wall is supplied fully assembled to make installation easier. Installation does not require the coping to be removed (except for the hanging plate option).

SPECIAL DEPTHS

For pools deeper than 2.07 m, please consult us, we can carry out a specific study.

ROLLER COVERS

ROLLINSIDE

The versatile cover

PRODUCT INFORMATION

- + Highly functional concept.
- + Suitable for many configurations
- + Aesthetic and discrete

Source: C7-Group

MOTORIZATION

There are 2 motors available:

- Dry pit motor
- Tubular motor
- Optionally insert-mount or surface mount
- Components available for concrete pools, styrofoam pools, metal pool, polyester shell pools.
- The required power is determined depending on the pool dimensions and the depth at which the Rollfit is installed: 120, 250, 500 or 750 Nm
- Operation via Wi-Key emitter, key switch or LivePool app
- Stop Flow included in delivery

Wi-Key emitter

SLATS

- PVC slats 84 mm for standard pools
- PVC slats 69 mm for all applications
- Polycarbonate solar slats
- See page 233.

MOUNTING

- Pushcock automatic lock for a water level of 8 to 13 cm above the decking
- Pushlock
- See page 236.

Surface mount version

SHAFT

Shaft optionally in anodised aluminium 20 µm or stainless steel (316L)

ALUMINIUM BEAMS

- Dimensions: 150 x 100 mm
- 1 side version: 2 beams in the upper part
- 2 side version: 3 beams of which 2 are in the upper part and 1 is in the lower part to keep the decking vertical

COVERING OPTIONS

- PCV decking 1 x 0.75 m fixed to the beams with clips, patented and available in 3 colours: white, beige, grey
- PVC decking: to be laminated with fabric-reinforced film
- Thickness: 20 mm
- Aluminum decking 1x0.75 m for tiling
- 2-sided decking e.g. as bench that can be used in the pool

ADAPTABLE TO DIFFERENT CONFIGURATIONS

- The Rollinside concept comes in 2 versions:
 - 1 side decking (horizontal)
 - 2 side decking (vertical and horizontal)

4 MOTOR POWERS AVAILABLE: 120 NM, 250 N, 500 NM AND 750 NM

- Also available: 750 Nm motor with electronic limit switches
- Improved cable quality
- Limit switch safe against lightning strikes (for 120 and 250 NM motor)
- Simplified wiring of limit switches due to reversible cores (no polarity)

MODELS

1 SIDE DECKING (HORIZONTAL)

2 SIDE DECKING (VERTICAL AND HORIZONTAL)

ELECTRIC BOX

- Exterior wall mounting to simplify installation
- Tropicalized boards for greater resistance (especially for tubular motors)
- Removable terminal blocks for easy electrical installation for the version with tubular motor, except for the motor and mains connection
- Integrated torque limiter interrupts the cover from being opened in case of excessive force, adjustable via potentiometer
- For higher operational safety, power module and control module are independent of one another in the tubular motor version

Filter stop

Connects the water treatment with the roller cover. Stops the water circulation while the cover is moving to avoid the slats from being drawn in. This feature can also be used to lock underwater lights, for example.

OPTIONS

PROFILE FOR POOLS WITH ROUNDED CORNERS

For pools with rounded corners from 5cm to 15cm radius, a profile is required. Please contact us for more information.

LINER ADAPTATION KIT

This option is required for pools equipped with a liner if the rounded corners are ≤ 5 cm. Please contact us for more information.

IVERNEA/ IVERNEA PLUS

Remember to order a winter protection to protect your slats from UV radiation and dirt.

PLEASE CONSIDER

LEVEL CONTROLLER

When purchasing this roller cover, we strongly recommend installing a water level controller. Take advantage of our complete set (float, wall bracket, and solenoid valve) for connection to the filter control system.

See page 132.

INFORMATION

STOP FLOW

Stop Flow included in delivery.

PRICES ROLLINSIDE

HOW TO CALCULATE THE TOTAL PRICE

ROLLINSIDE-L WITH 1 SIDE COVERING

How to determine the required motor power and tube diameter:

- 1. Determine the pool width and length
- 2. Determine the distance between the pool edge and the top side of the decking

You get the required motor power and tube diameter.

EXAMPLE

SWIMMING POOL 4.50 X 10.50 M:

- 1. Calculation: width 5 m and length 11 m.
- 2. The distance between pool edge and top niche decking can be: < 0,55 m, between 0.55 m and 1.34 m or between 1.34 m and 2.18 m

For a pool depth of 1.70 m: 750 Nm motor, Ø 140 mm tube.

		Pool width (m)

HOW TO CALCULATE THE TOTAL PRICE

i ROLLINSIDE-L WITH 2 SIDE COVERING

Wall units or sealing kit, tube and motor.

- 1. Determine the pool width and length.
- 2. Determine the total pool depth.

You get the required motor power and tube diameter.

EXAMPLE

SWIMMING POOL 4.50 X 10.50 M:

- 1. Calculation: width 5 m and length 11 m.
- 2. The total pool depth can be < 1.42 m, between 1.42 m and 2.21 m or between 2.21 m and 3.05 m.

For a pool depth of 1.70 m: 500 Nm motor, Ø 140 mm tube.

		Pool width (m)																Distance between upper pool edge and bottom of pool

ABOVE-GROUND AUTOMATIC SLATTED COVERS

MOON

Modern and customizable design

SWIMMING POOL TYPE

- For pools with a width of 2.5 - 5 m and a length up to 13.5 m.

PRODUCT INFORMATION

- + Unique design
- + High-quality and innovative materials
- + Tube supported by bearings

Source: C&G Group

END-STANDS

Thermoplastic and composite structure

- Metallic champagne grey or shiny ice white
- Other end-stand colours on request (option)
- Excellent resistance to impacts and scratches
- Removable end-stands to facilitate maintenance

Aluminium frame, 3 mm thick, grey polyester powder coating.

Blocks used to adjust the level of end-stands.

CENTRAL DISK

- Colour disks, 7 colours to choose from.

ALUMINIUM TUBE

20 micron anodised aluminium tubes

SLATS

- PVC 69 slats or polycarbonate solar slats
- See page **233**.

MOTORIZATION

Tubular electric motor

- Adjustable mechanical limit switches. Motor with winch (to unroll the slats in case of a power failure and to secure the pool despite an electric breakdown)
- Extended service life of the motor thanks to plain bearings which support the tube and therefore the weight of the cover

Operation via Wi-Key emitter, key switch or LivePool app.

Wi-Key emitter

Surface mount version

LOCKING KITS

- At the start and end of automatic covers
- Pushlock, Quicklock, or Straplock
- See page **236**.

ABOVE-GROUND ROLLER COVER WITH AN INDIVIDUAL TOUCH

- Choose the end-stand colour: champagne grey or ice white
- Customize the central disc of your electric roller: 8 colours to choose from

AVAILABLE VERSIONS = ELECTRIC OR SOLAR

- Save electricity and installation time (no cable laying required), choose the solar version for pools up to 5.00 x 11.00 m
- Delivered with 2 high performance batteries and 1 solar panel with photovoltaic cells

AVAILABLE WITH POLYCARBONATE SLATS

- Above-ground roller covers are available with polycarbonate solar slats
- See page 233.

OPTIONS

COLOUR OF YOUR CHOICE

For even more customisation, choose your own colour for the end-stand and the central disk.

Solar version:

Solar cells on the motor side; you can choose the colour of the central disk on the opposite side

STOP SALT CONTROL BOX (FOR ELECTRIC VERSION)

The "stop salt" control box automatically sends the information: "cover closed" or "cover open" to the salt electrolysis unit.

The Moon roller is also available with an end-stand on the motor side and a wall unit for the tube on the free side. Please contact our project planning department.

ABOVE-GROUND AUTOMATIC SLATTED COVERS

TIXIT

New design that enhances any garden

SWIMMING POOL TYPE

- For pools from 2 x 3 m up to 5 x 13.5 m.

PRODUCT INFORMATION

- + Modern, innovative
- + Elegant and discrete thanks to the sleek end-stands
- + LED lighting to highlight the end-stand design
- + Selection of colours for a perfect integration in your garden
- + Electric and solar versions

Source: CF-Group

END-STANDS

- Drive optionally electric or via solar cells
- Coloured aluminium end-stands
- Choose from 3 end-stand colours
- Compact end-stands (+98 x 175 mm)

Option:

Pool Sound Bluetooth speakers in end-stand (electric version only)

MOTORIZATION

Tubular electric motor

- Adjustable mechanical limit switches. Motor with winch (to unroll the slats in case of a power failure and to secure the pool despite an electric breakdown)
- Extended service life of the motor thanks to plain bearings which support the tube and therefore the weight of the cover

Operation via Wi-Key emitter, key switch or LivePool app.

Wi-Key emitter

ALUMINIUM TUBE

20 micron anodised aluminium tubes

DECORATIVE LED STRIP

- 12V LEDs
- On/off switch on end-stand
- Only for electric version

LOCKING KITS

Pushlock, Quicklock, or Straplock

- See page 236.

Surface mount version

SLATS

- PVC 69 slats, PVC 84 slats or polycarbonate solar slats
- See page 233.

A CUSTOMISABLE ABOVE-GROUND AUTOMATIC COVER

- Choose from 3 end-stand colours
- Compatible with all DEL slat types:
Polycarbonate solar slats, PVC slats 69 mm, PVC slats 84 mm

HIGHLIGHTS EVERY GARDEN

- End-stand lighting as an additional spotlight (electric model only)

SOLAR VERSION

- The solar model is specifically designed for renovation purposes (no cable laying). Supplied with 2 high performance batteries and 1 solar panel with photovoltaic cells

OPTIONS

OTHER END-STAND COLOURS ON REQUEST

3 colours available: White / Grey / Black.

AUTOMATIC STOPS (FOR THE ELECTRIC VERSION)

In case of excessive load, a circuit board prevents the cover from opening.

STOP SALT CONTROL BOX (FOR ELECTRIC VERSION)

The "stop salt" control box is used to automatically adjust the electrolysis unit by sending a "cover open" or "cover closed" signal to the water treatment system.

INFORMATION

POOLSOUND

The cover end-stand is tuned into a bluetooth speaker to play music in the garden, quick and direct connection.

Available only for electric version.

ASSEMBLY INSTRUCTIONS

Remember to connect the cables between the end-stands for the lighting and the optional Pool Sound.

ABOVE-GROUND AUTOMATIC SLATTED COVERS

CONTURA

Innovative design for large swimming pools

SWIMMING POOL TYPE

For pools with a width of 2.5 - 10 m and a length up to 18 m.

PRODUCT INFORMATION

- + Modern design
- + Quick and easy to install
- + Tube supported by bearings
- + Adjustable end-stand feet

Source: CF-Group

END-STANDS

2 end-stand sizes:

- Shaft height at 32 cm (for pools widths from 2.50 to 5.00 m)
- Shaft height at 42 cm (for pools widths from 5.50 to 10.00 m)

Aluminium frame

- Metal grey colour
- Excellent resistance to impacts and scratches
- High UV stability

Adjustable feet to adapt the end-stand levels if the coping is curved.

LOCKING KITS

- At the start and end of automatic covers
- Pushlock, Quicklock, or Straplock
- See page **236**.

SLATS

- PVC 69 slats or polycarbonate solar slats
- See page **233**.

MOTORIZATION

Electrical version

- Adjustable mechanical limit switches. Motor with winch (to unroll the slats in case of a power failure and to secure the pool despite an electric breakdown)
- Extended service life of the motor thanks to plain bearings which support the tube and therefore the weight of the cover
- Tubular motor 12 V

Solar version

- The end-stand has one or three solar panels depending on the pool size

Operation via Wi-Key emitter, key switch or LivePool app.

Wi-Key emitter

ALUMINIUM TUBE

20 micron anodised aluminium tubes

Surface mount version

AVAILABLE VERSIONS = ELECTRIC OR SOLAR

- Save electricity and installation time (no cables), choose the solar version for pools up to 10.00 x 15.00 m or 10.00 x 18.00 m.
- Delivered with 2 high performance batteries and 1 or 3 solar panels with photovoltaic cells

AVAILABLE WITH POLYCARBONATE SLATS

- Above-ground roller covers are available with polycarbonate solar slats
- See page 233.

OPTIONS

STOP SALT CONTROL BOX (FOR ELECTRIC VERSION)

The "stop salt" control box automatically sends the information: "cover closed" or "cover open" to the salt electrolysis unit.

The Contura roller is also available with an end-stand on the motor side and a wall unit for the tube on the free side. Please contact our project planning department.

MOBILE ROLLER COVER

MOOVE'O

Mobile solar automatic roller for free form pools

SWIMMING POOL TYPE

For pools with a width of 2.5 - 5 m and a length up to 11 m.

PRODUCT INFORMATION

- + Allows the roller to be moved away from the pool
- + Suitable for all pool shapes
- + Rail-free aligned motion
- + High performance solar panels
- + Solar energy used to roll the slats
- + Unique design

FRAME

- End-stands**
 - Stainless steel structure, white, beige or grey lacquered
- Central bar**
 - Lacquered aluminium
 - Allows water to flow to the pool
- Solar panels**
 - High performance photovoltaic cells to power the motor
- Non-marking blue polymer wheels with brake**
 - Front wheel: Ø 150 mm
 - Back wheel: Ø 200 mm
- Stoppers for front wheel**
 - The stop is used to ensure that the roller is in the correct position before opening or closing

SLATS

- PVC 69 slats or polycarbonate solar slats
- See page 233.

KEY BUTTON

- Is used to open and close the automatic cover (optionally in left or right end-stand)

LOCKING KITS

- At the start and end of automatic covers
- Pushlock, Quicklock, or Straplock

MOTORIZATION

- Electrical tubular motor 12 V**
 - Adjustable mechanical limit switches
 - 2 x 12 VCC batteries, battery charger included

ALUMINIUM TUBE

20 micron anodised aluminium tubes

Surface mount version

IDEAL FOR RENOVATION

- The Moove'O does not require any construction works
- Easy and fast to install since supplied fully assembled and ready for operation

AVAILABLE WITH POLYCARBONATE SLATS

- Above-ground roller covers are available with polycarbonate solar slats
- See page **233**.

OPTIONS

COLOUR OPTIONS

Match your Moove'O-L with the colour of your slats. The structure of this mobile roller cover is also available in beige or grey.

DIN EN 17645 sTANDARD*

Automatic slatted covers

Covers can have a significant impact on the energy efficiency and thus on the environmental balance and footprint of a pool. Depending on the design, they can alter the thermal performance of a swimming pool by:

- contributing to the pool insulation
- limiting heat loss through evaporation
- transmitting the sun's rays onto the water

These three properties are summarized by one indicator, namely the natural thermal balance of the cover.

ENERGY SAVING COEFFICIENT

Compare the natural heat balance of the product with the natural heat balance of an uncovered pool

NATURAL THERMAL BALANCE

Energy balance (gains + losses) through:

- Insulation against heat loss
- Limitation of heat loss through evaporation
- Heat recovery through solar radiation

POWER SUPPLY

Power in active mode

REDUCTION OF EVAPORATION

Coverage of the pool in % of the pool surface

POWER SUPPLY

Power in standby mode

RENEWABLE ENERGY

EXAMPLES OF ENERGY LABELS FOR OUR PRODUCTS

- Solar Tixit + solar polycarbonate slats crystal-black

- Rollinside + solar polycarbonate slats crystal-black

- Solar Tixit PVC 69 slats grey

- Rollinside PVC 69 slats grey

* The EN 17645 standard assesses the efficiency of the environmental compatibility of swimming pools and their equipment. The standard applies to permanently installed outdoor swimming pools.

A large indoor swimming pool with a dark wooden deck and large glass windows overlooking a snowy outdoor area. The pool water is clear blue, and there are some people swimming. A teal diamond-shaped graphic is overlaid on the pool.

Beautiful pools

Source: Steglich
Schwimmbadtechnik

Together with our partners, we have realized many of the most beautiful pools all over the world.

See the following examples.

An outdoor swimming pool in a snowy landscape. The pool is surrounded by snow-covered evergreen trees and mountains in the background. A circular metal structure is partially submerged in the water, and a small waterfall is visible. A birch log is in the foreground.

AUTOMATIC SLATTED COVER

OPAQUE PVC 84 SLATS

The standard PVC slats in a unique, modern, and linear design

SWIMMING POOL TYPE

- For in-ground and above-ground automatic slatted covers
- For pools up to 5.00 m wide*

PRODUCT INFORMATION

- + Modern and sleek design
- + Flat slats for a perfect finish on the water surface
- + Quick and easy to install
- + Patented system

Source: CF-Group

INFORMATION

SLAT MODULE COMPOSITION

- Extruded PVC slats
- Thickness 11.4 mm.
- No lead-based additives
- Resistance to staining from organic deposits
- Material compliant with age resistance requirements defined by standard NF T54-405-1: 2013 standard.
- UV treatment

L1 MODULE

- Dimensions : 84 mm width
- Used at the 2 ends of the cover, and to adjust the cover length

L4 MODULE

- Dimensions : 332 mm width
- L4 module is the main part of the slat cover. It allows to cover a large surface in one piece, and has a flexible joint between the slats.

END CAPS

- Welded to the slat

FLANGES

- Removable flanges for assembly and disassembly of slats
- Three sizes available (standard, S and XL) to best adjust the slat dimensions. S size can be used to adjust by 1 cm per side (or 2 cm per slat).
- Special end caps in different radii for corners and (Roman) steps

INFORMATION

COLOURS

White

Grey

Flexible joints and caps are black.

The flange color is the same as that of the slats.

* To comply with the French safety standard NF P 90-308, the slats L 84 must have a length of at least 2.50 m

MODERN DESIGN

- A two-tone slat, unique on the market
- Number of joints, soiling surfaces, reduced by 80% compared to classic slats:

EASY TO INSTALL

- Sliding assembly is a patented system that makes installation easier and faster.

ADAPTABLE TO ALL AUTOMATIC ROLLER MECHANICS

- Reduced rolling diameter, identical to opaque PVC 69 slat

INFO

COMPATIBILITY

The opaque PVC 84 slats are available for:

- In-ground automatic slatted cover
- Also available for above-ground covers
- Pools wide up to 5.00 m
- Pushlock locking system only

A cover contributes to reducing environmental impact and also has economic benefits. See p.6 of technical leaflet.

For a schematic drawing of the 84 PVC opaque slats and further information on the new slats, see page 47 of technical leaflet.

COMPATIBILITY

- Pools with radius
- Pools with cut-out or stairs
- Pools with overflow gutter

INFORMATION

ASSEMBLY OF SLATS

Advantages of sliding assembly:

- Faster and easier assembly of slats
- No risk of damaging the slats during assembly
- It is very easy to remove a damaged slat without damaging the other slats
- Installation of the slats solely by sliding them in from the side; conventional click assembly is not provided.

AUTOMATIC SLATTED COVER

SOLAR POLYCARBONATE SLATS

Standardized ultra efficient solar slats

SWIMMING POOL TYPE

For swimming pool with a width up to 10 m**

PRODUCT INFORMATION

- + Extremely high shock resistance
- + Suitable for above-ground and in-ground automatic covers
- + Reduced rolling diameter
- + Anti-UV treatment.

Source: CF-Group

INFORMATION

EXTRUDED POLYCARBONATE SLATS

- Width 69 mm / thickness 13 mm

BLACK CAPS

- Watertightness sealing inside the slat

END CAPS

- Installed inside the slat
- 3 sizes available: S (15 mm), Standard (25 mm), XL (35 mm)
- Special end caps in different radii for corners and (Roman) steps

INFORMATION

The solar polycarbonate slats can also be used with above-ground covers without decking.

PRO TIP

The solar polycarbonate slats are not compatible with bromine treatment.

INFORMATION

5 cm radius

10 cm radius

15 cm radius

20 cm radius

End caps for stair radius

End caps for stair radius

COLOURS

Deep black

Crystal blue*

Crystal green*

Crystal brown*

Crystal*

Crystal black

Silver black

COLOURS

There can be significant variations of colours in solar polycarbonate slats depending on the exposure to sunlight.

* Slats > 6m and coloured polycarbonate slats (except crystal black and silver black) - delivery time approx. 6-8 weeks after receipt of order

** To comply with the French safety standard NF P 90-308, the slats L 69 must have a length of at least 2 m

A HEAT GENERATOR

- The solar polycarbonate slats are real solar panels which allow a heating of the pool water.
- They are considered a real heating system.

ADAPTABLE TO DIFFERENT POOL CONFIGURATIONS

- Thanks to their end caps in 3 different sizes and their rounded shape for different radii, the slats can be adapted to any pool configuration.

EASY MAINTENANCE

- Assembly by sliding is a patented system which facilitates assembly and removal of slats. This assembly method is possible thanks to the removable end caps.
- The traditional clipped assembly method is still possible as well.

INFO

OUR SLATS ARE HAIL PROOF

Tests carried out by an independent laboratory show that polycarbonate slats are highly resistant to hail.

What the tests prove:

- Polycarbonate slats remain perfectly watertight for hailstone sizes up to 4 cm (the size of a golf ball).
- Polycarbonate slats remain perfectly functional and allow the cover to be opened and closed even after being hit by 5 cm hailstones (the size of an egg).
- Nevertheless, roller covers must be retracted in extreme weather conditions for safety reasons.

WATERTIGHTNESS THANKS TO GLUING

If necessary, the slat size can be adapted on site. Once the slat is cut to size and a new cap is fitted (available in the spare parts catalogue), the original end cap can be easily reattached.

END CAP SIZES

XL / Standard / S

We offer 3 end cap sizes (XL/Standard/S) for the best possible adjustment of the slat dimensions. They can be used to adjust by approx. 1 cm on each side (or 2 cm per slat).

AUTOMATIC SLATTED COVER PVC L69 SLATS

Opaque

INFO PVC L69 SLATS

- PVC slats width 69 mm, thickness 13 mm available for pools up to 10 m in width
- End caps in 3 sizes (15, 25, 35 mm) and for various radii in slat colour
- Excellent buoyancy
- Material: PVC without lead additives
- UV stabilised
- The material complies with standard NF T54-405-1:2013 regarding resistance to aging
- Classic clip assembly is possible

Beautiful pools

Together with our partners, we have realized many of the most beautiful pools all over the world.

See the following examples.

Source: Delfin Wellness GmbH

Source: Delfin Wellness GmbH

AUTOMATIC SLATTED COVER
PUSHLOCK

Locking set for slatted covers

SWIMMING POOL TYPE

For pools from 2.00 to 10.00 m.
For rectangular pools only (available with a radius of up to 50 cm - not with external steps).
The Pushlock automatic system is only installed on the end side opposite the roller

PRODUCT INFORMATION

- + Automatic locking and unlocking of the slatted cover, no manual handling required.
 - + Available in 4 colours
- COMPATIBLE WITH:**
- Rollenergy Evolution
 - Rollin
 - Rollinside with distance between water line and decking 89 - 13 cm
 - Rollover

Source: CF-Group

PUSHLOCK AUTOMATIC

REINFORCED FIRST SLAT WITH INTEGRATED HOOK

Compatible with opaque PVC 69 slats, solar polycarbonate slats, and opaque PVC 84 slats.

WALL BRACKET, HANGING FITTING, FOR HOLDING THE HOOK

Bracket made of stainless steel (316L marine grade). With 8 fixing points that adapt to the water level of the pool.

INFORMATION

- Patented system designed and developed by CF Group.
- Automatic locking set for slatted covers compliant with the French standard NF P90-308.
- This means the user no longer needs to manually lock or unlock each system. Thanks to the Wi-Key control system or the LivePool application of the key switch, the slatted cover opens or closes and locks with a single gesture.

FEATURES

- Cover made of ABS material and suspension in 316L stainless steel.
- Available with adjustable suspension device.
- Available in 4 colors: white, light grey, anthracite grey, and black.

REQUIREMENTS

- The water level must be monitored to ensure proper functioning of the fittings, and the automatic switch must be activated.

Each automatic fitting must:

- be at a maximum distance of 90 cm from the pool edge. Maximum distance to the next Pushlock Automatic lock is 3.24 m
- A special Pushlock automatic control box must be installed, which is electrically connected to each Pushlock automatic (available as an option):

COLOURS

adjustable suspension

INFORMATION

PACKING LIST

- Reinforced first slat
- Pushlock automatic locking set
- Pushlock automatic control box

WIRING

For easy installation and optimal compatibility with the electrical system, while ensuring water resistance, we recommend using cabled type H05RNF-2x0.75.

PRICE INFORMATION

To comply with the French safety standard NF P90-308, the locking sets must be installed according to our recommendations in the technical manual. The positioning of the locking sets is determined by CF Group based on the configuration of your swimming pool. A detailed drawing will be sent to you upon delivery of your cover.

Pool width	Pushlock automatic
From 2.00 to 5.04 m	double
From 5.05 to 8.28 m	triple
From 8.29 to 10.00 m	quad

PUSHLOCK MANUAL

INFORMATION

- Safety kit, aesthetic and discrete
- Ultra strong material
- Adaptable to rounded and trapezoid shapes

NEW: DIRT-REPELLENT STRAPS

The Pushlock locking system is now available with a new strap. These straps are made of a fabric with a dirt-repellent PVC coating that does not turn green.

The straps are easy to assemble and replace.

The strap colour is matched to the slat colour.
