WELLNESS

EXPERIENCE SHOWER NOZZLES

Innovative specialty nozzles designed for experience showers.

These special nozzles combine the advantages of an optimal sensory experience with low water consumption – hence their success in many renowned spas, waterparks, and wellness hotels.

The nozzles are made of high-gloss chrome-plated brass.

The special design of the nozzles protects them from lime deposits and ensures that water droplets do not enter the lungs. As a result, there is no risk of a transmission of legionella.

The range includes seven different models for very different applications.

NOZZLES / INLETS

DESCRIPTION		ART. NO.
